Printing Out Of Logos For Mac

I've had trouble Office for Mac (p. 2014 on an iMac, operating via Captiva Web Office 2013) against no problems publishing or converting a spreadsheet. I eventually got one with page with the issue: that have content, published in dark and white. You click on Print out, and then wait around a second Nothing happens You try has obviously failed. Today when I attempt to print out with my HP Officejet 7612, a spreadsheet with logos and colored boxes (both fill and text) will only print one with page, black and white, and no images.
